About AMESA

The Association for Mathematics Education of South Africa – **AMESA** – is the national professional association and voice of Mathematics Education in South Africa, representing the interests of the discipline and its members.

The aims of AMESA are, in general, to promote Mathematics Education and, in particular, to enhance the quality of the teaching and learning of mathematics by providing vision, leadership, and professional development to support teachers in ensuring mathematics teaching and learning of the highest quality for all learners.

To achieve these aims, AMESA implements the following strategies:

- Providing a forum for all concerned with the teaching of mathematics at all levels;
- Encouraging research related to Mathematics Education and bringing the results of such research to the attention of its members;
- Formulating policy statements on matters regarding Mathematics Education and promoting such perspectives;
- Actively engaging in Mathematics Education projects that will result in the social, economic, political and cultural development of society;
- Encouraging and assisting its members to strive towards a high standard of professionalism in the exercise of their profession.

Annual National Congress

The annual national congress provides a platform to realise many of these aims.

AMESA currently has about 2 500 members, including mathematics teachers at primary, secondary and tertiary levels, adult education facilitators, education department officials involved in mathematics education, university mathematicians and mathematics teacher-educators and researchers.

The congress is typically attended by about 1 000 members, as well as by representatives of all the major publishing houses, NGOs and mathematics education projects.

Why sponsor or exhibit?

Your organisation will gain maximum visibility and exposure, reaching:

- A specialised, concentrated audience of *leader teachers – prime users and buyers* of mathematics products, services and ideas;
- *Mathematics curriculum advisors* and *education department officials* – the people responsible for curriculum design, policy implementation, textbook adoption, and equipment purchase;
- *University, NGO and project personnel* – pre-service and in-service teacher-educators and researchers, influential leaders in mathematics teacher professional development.

Congresses are very costly. AMESA contributes and participants pay a registration fee.

However, to ensure that the congress experience is of a high quality and is accessible to more teachers, we very much depend on appropriate sponsorships.

In the table on the following pages we describe possible investments and sponsorships, together with the benefits that you might gain by your involvement.

Please consider supporting the AMESA congress at a level suiting your needs and budget.
