

Your Age by Chocolate

Petta McLellan

This is pretty neat. It really works, and it takes less than a minute. Be sure you don't read the bottom until you've worked it out! This is not one of those waste-of-time things, it's fun.

Do the calculations as you read along:

1. Pick the number of times a week that you would like to have chocolate (more than once but less than 10)
2. Multiply this number by 2 (just to be bold)
3. Add 5
4. Multiply by 50 -- I'll wait while you get the calculator
5. If you have already had your birthday this year (2007) add 1757; if you haven't, add 1756
6. Now subtract the four-digit year that you were born.

You should have a three digit number: the first digit of this is your original number (i.e. how many times you want to have chocolate each week), and the next two numbers are YOUR AGE!
