The Answer Series is proud to announce their first webinar for Maths teachers across South Africa.

With over 45 years as a Mathematics author under her belt, Anne Eadie will be sharing her expertise and specially developed content for effectively teaching Level 3 and 4 Maths questions of the matric examination. The webinar comes as a response to the Department of Education's diagnostic reports from 2014 to 2019, which revealed that the majority of learners significantly underperform in these questions, which form 45% of the exam.

Data and statistics based on 6 years of research into level 3 and 4 questions will be shared. The combination of training and tailored content will be a game-changer for both teachers and learners.

Register before 13 September to secure your place!
